ABS takes great pride in delivering you a high quality product, so please follow the steps below to ensure your system is properly prepared before turning on your computer.

## STEP 1 — Remove Packaging Foam

Remove screws from the left side panel. Then remove the panel.

Carefully remove the protective foam.

⚠ DO NOT turn on your computer before removing foam.

STEP 2 — Inspect your PC for loose wires.

Ensure all component cables are securely connected (some may loosen during shipping). Put the left side panel and screws back on.
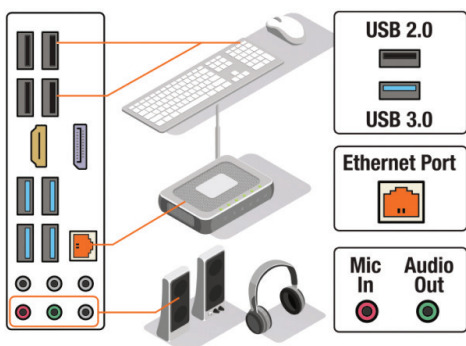

STEP 3 — Connect to your monitor.

Know Your Connectors
- VGA
- DVI (Single-Link)
- DVI (Dual-Link)
- HDMI
- Display Port

Remove protective cap from ports.

Connect your monitor cable to an available video port on your graphics card.

STEP 4 — Connect your peripherals.

- USB 2.0
- USB 3.0
- Ethernet Port
- Mic In
- Audio Out

Connect your keyboard, mouse, audio, and network to their matching ports on the motherboard I/O by connection type or color. Any included network adapters or antennas will be in the motherboard box.
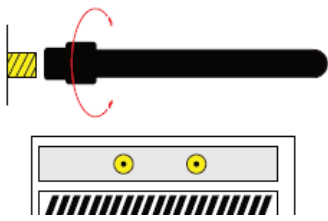

Connect Antennas: The WiFi receiver may come as either 2 separate antennas or a single device with wires that attach to the gold connectors.

STEP 5 — Power on your ABS system

Must Be Set to 115V
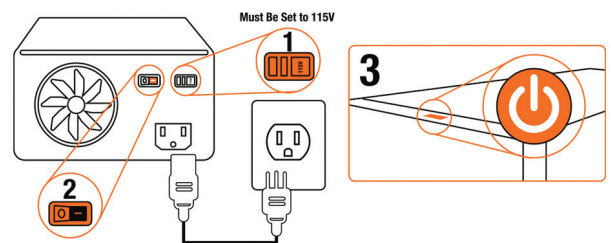

Use the included power cord to connect your power supply unit (PSU) to a wall outlet or surge protector. Turn the power supply switch on before pressing the front power button.

Note: International customers will need to set the PSU from 115V to 230V.

Why is my Windows not activated?

When you purchase a computer from ABS, activation of Windows can sometimes take up to 48 hours. If your Windows is still not activated after 48 hours, please follow these steps to retrieve your product key and activate Windows:

1. Click the Windows start icon and type in **cmd**

2. Click **Run as administrator** when prompted

3. Type or paste the following command, and then press **Enter: wmic path softwarelicensingservice get OA3xOriginalProductKey**

4. Click the Windows start icon again and go to **Settings > Update and Security > Activation**

5. Press the **Change Product Key**

6. Enter your product key into the pop-up box, press **Next**, then **Activate**.
